MIDDLETON B1122/B1125 - RESUME OF RESPONSES TO MIDDLETON PARISH COUNCIL TRAFFIC ENQUIRY

B1125 (12 consultations) Four residents along the B1125 responded; one had experienced no difficulties and did not anticipate 'Sizewell A' decommissioning would exacerbate the situation. The others were concerned with prevailing excess traffic speeds, especially at sharp bends and on brows on hill. Additional traffic consequents upon the 'A' Station works were generally not considered significant for this route.

B1122 (26 Consultations) Nine residents along the B1122 replied with all having concerns on traffic and/or environmental matters. The switching between the restricted 40 mph and 30 mph limits was considered unhelpful to road users, which allied to the lack of enforced Speed control measures at road bends and the brow of the hill, particularly by the 'Thatched House' were the main concerns. Poor visibility and lack of clearance from the road edges also featured in the replies received, as were fears that Sizewell 'A' decommissioning and potential further development of the Sizewell complex would cause the road safety and the environment to deteriorate.

CONCLUSION:-

That Suffolk County Council Road Safety and Suffolk Constabulary Traffic Divisions be notified of the consensus of this enquiry together with other relevant agencies, adjoining parishes and Sizewell A Decommissioning Management.

FOR YOUR INFORMATION:-

Following concerns raised by various residents along the above routes, the attached enquiry was made to directly affected residents and the above summarises the replies received.
